

Certification Organizations (COs)

Question 21: What benefits and risks would COs provide to IDIs, third parties, and consumers?

Question 22: To what extent would COs be effective in assessing compliance with applicable standards in an environment with rapidly developing technology systems, products, and platforms, especially given the potential need to reassess and reevaluate such systems, products, and platforms as technologies or circumstances change?

Question 23: For model validation and testing, would COs evaluate a model based solely on reports, testing results, and other data provided by the third-party provider of the model? Or would the COs need to test the model and generate their own test results? What steps would the COs need to take to protect the intellectual property or other sensitive business data of the third party that has submitted its model to the validation process?

Question 24: If COs receives derogatory information indicating that a certified third party or certified model or technology no longer meets applicable standards, should the COs develop a process for withdrawing a certification or reassessing the certification?

(1) If so, what appeal rights should be available to the affected third party?

(2) What notification requirements should COs have for financial institutions that have relied on a certification that was subsequently withdrawn?

(3) Should the FDIC or Federal/state regulators enter information sharing agreements with COs to ensure that any derogatory information related to a certified third party or certified model or technology is appropriately shared with the COs?

Question 25: Are there legal impediments, including issues related to liability or indemnification, to the implementation of a voluntary certification program that the FDIC, other Federal/state regulators, third-party providers, and IDIs should consider?

Question 26: To what extent should the FDIC and other Federal/state regulators play a role, if any, in the identification and oversight of COs, including assessments of ongoing operations? Should the FDIC and other Federal/state regulators provide oversight of COs, or should another entity, such as an SSO, provide such oversight?
